

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: October 4, 2001/2:00 p.m.

Site Contact(s): Chris Gilbreath
Phone: 303-966-7355

Regulatory Contact: Denise Onyskiw
Phone: 303-692-3371

Agency: Colorado Department of Public Health and Environment

Purpose of Contact: Notification for Removal of Steam Condensate Tanks T-107, T-108

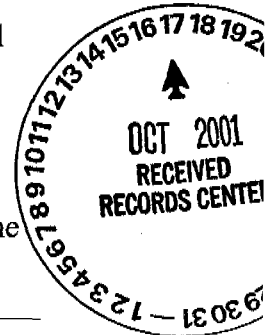

Discussion

The information on the steam condensate tanks T-107 and T-108 (referred to as Tanks 774A and 774B in the B771 RLCR Supplement) is as follows:

During the development of the RLCR Supplement, the Site did not complete the PDS on the tanks due to inaccessibility. As a result, these tanks were typed as Type 2 due to potential contamination (status was unknown) and the presence of asbestos. On October 3, 2001, six (6) 100 cm² coupon samples were collected from the tanks (3 per tank). All survey results were less than 100 dpm/100 cm² total and 20 dpm/100 cm² removable. These values provide a preliminary indication that the tanks will qualify for unrestricted release.

The path forward for tank decommissioning is to first remove the asbestos from the pipes. Once the asbestos has been removed, the tanks will be lifted to an area outside of the wetlands to perform a more detailed survey. Given the degradation observed on the tank bottoms, as the tanks are lifted the water currently held in the tanks (approximately 6 inches - which is consistent with the water currently contained in the concrete pad) will remain contained in the concrete pad. The concrete pad will be removed at a later date during environmental restoration activities.

Once the tanks have been surveyed, they will be released per RSP-09.01 (Unrestricted Release procedure) or dispositioned as SCO. The Site will provide the CDPHE with the release evaluation, as requested.
